

ROYAL DOOR Ltd.  
A Canadian Company Established Since 1975

## Spring 2019 Newsletter

### Exterior Pre Hang Units

- A Wood Door on the front of your home is a great way to add a unique touch and have your entrance stand out.
- Any of our Exterior Doors can be manufactured as a Pre Hang Unit, they can be made as a "Single" or a "Double" door.
- They can include 1 or 2 sidelites and/or a transom.
- Pre Hangs can be made with any of our Exterior Doors.
- Hung on hinges, in a frame with a sill/sweep/weatherstripping.
- They will still need to be installed, drilled for the handle & lockset, finished (paint/stain) and then sealed.

### Tip of the Season

Outswing Units are not covered under our warranty, a strong wind could rip it off the hinges when opened and water will get in behind the exposed edges of the door destroying it from the inside out.

## Add Curb Appeal with our Exterior Doors

### Exterior Door Dont's

- Finishing your exterior door in "Black" or any other "Dark" colours will attract the sun and not only destroy your door but void the warranty.
- Do not install exterior doors when the temperature is below -8°C, the finish will not dry and set properly.
- Not finishing the door/unit as quickly as possible will lead to warpage, the wood will absorb moisture in its raw state.
- Installation for Exterior Units is not for an amateur, improper installation can lead to drafts, warpage, and performance issues.
- Before choosing the largest door you can, think about its practicality and what it would be like to operate such a massive door daily.

### Door of the Season

### *PH: Single Door - Dual Side Lite*

This setup usually allows for a larger door which is great for bringing in appliances and help to brighten your foyer with natural light.
