

ROYAL DOOR Ltd.  
A Canadian Company Established Since 1975

## June 2019 Newsletter

**Currently Open on Saturday 9:00 - 12:00 until August 31**

### RD Offers Some of the Fastest Production Times

- Since all of our doors are made at our local plant in Concord, our production time is about a week or so and is faster than the months-long wait time of other companies who outsource their doors beyond our province.
- Our "Rush" Services can have your doors made in 3 or 5 days guaranteed, this can help you quickly close out your job so you can start your next one.
- Custom sized doors can be made just as quickly, you can finish up your project with odd sizes in no time.
- Do you need 1-3/4" doors at 8 ft. tall? Royal Door can have them made in about a week, no waiting for imported goods.

### Tip of the Month

Old homes usually have door styles that are not around anymore, we can match these unique rail sizes and odd panel layouts in any sizes you need.

## Contractor Season is Upon Us

### All of Our Doors Are Solid Wood

- All-natural products expand in warm weather and contract when it gets cold, wood is no different and small allowances are made in our doors to compensate for these shifts in temperatures.
- If you cannot paint your doors right away, at least prime them (all six sides) to prevent moisture absorption.
- Cutting doors to fit odd sizes changes the aesthetics and can weaken the internal structure, this will lead to doors not lining up with each other and offset features.
- Our doors are solid wood and can be drilled into, so hardware/hangers/knockers/peep holes/tracking can all be installed without destroying the door.
- Any of our panels can be changed with glass/mirror, which can be a simple way of keeping a consistent style while giving a different look.

### Door of the Month

- the SAM profile is a great way to add a subtle touch of depth to your doors.
- more of a traditional look, the applied moulding can help make your doors come to life.
- A popular profile for older homes, use Royal Door to keep the continuity that is difficult to find elsewhere.
