

ROYAL DOOR Ltd.
A Canadian Company Established Since 1975

July 2019 Newsletter

Currently Open on Saturday 9:00 - 12:00 until August 31

Home Grown Products

- Royal Door is a local manufacturer that uses Canadian made materials to construct all of their products.
- Using woods which are climatized for our Canadian seasons, the quality and construction of our doors are made to last.
- Off-shore products may be less expensive, but they are made with inferior materials and are hazardous to the environment as they are not regulated by any government organization.
- Royal Door only uses CSA approved materials and abides by our strict environmental regulations.

Tip of the Month

Although exotic woods look beautiful and have unique appearances, wood from a dry-warm climate will not last in Canada as it is not tempered to our harsh weather.

Canadian Made suited for Our Climate

Suitable Woods

Finger Joint Pine (Paint Grade)
Recycled Pine products which are glued together, provides stability to the doors and can help you cut costs when painting.

Clear Pine (Paint or Stain Grade)
A Veneered skin covers the finger joint, ideal for painting and can also be stained or apply a clear urethane for a rustic look.

Red Oak (Stain Grade)
A dense wood with a tight grain, our oak has a bold colour which comes to life when stained and makes your doors stand out.

Soft Maple (Stain Grade)
A subtle wood with a silky finish and loose grain.

Western Red Cedar (Stain Grade)
Exceptional for high-moisture areas and exterior applications, it's reddish-brown hue and distinctive smell gives a rustic atmosphere.

Door of the Month

- A classic look with a modern touch to give any traditional home a new feel.
- Small panes allow light to enter the home and still offer a great deal of privacy.
- The dark oak is contrasted well with the light that peers through the glass.
- This style also works well as an interior "showpiece" door for a library or office.
