## June 2020 Newsletter

Our newsletter contributor has been a Royal Door client, Pino Sportelli, for over a decade and has worked with various companies throughout the years. He recently started up a new company, called Arkiform Construction Inc. Even though Arkiform came into existence over 3 years ago, Pino has been building, renovating, restoring and designing for the last 25 years.

Arkiform can execute all your expectations with turnkey results. They are a member of CAHP (Canadian Association Heritage Professionals) restoring heritage homes and buildings. They can help their clients visualize their dreams in residential, commercial, heritage and dental offices.

They pride ourselves with co-manufacturers like Royal Door for all their standard and custom designed doors that are fitted to accuracy using quality materials and knowledgeable workmanship.

Enclosed is a sample of their finished project, tagged Dr. Frank Procopio Dental Office, which featured doors from Royal.

Let them help you create your masterpiece. For further info, please contact;
